

5W LED GU10 IP44 Downlights

Redrow Homes, Nationwide, United Kingdom

Solarcrown Commercial have recently renewed their contract for the 4th year running as the specified supplier of LED downlights to award winning house builder Redrow Homes. Solarcrown Commercial developed the product to meet the specifications required by Redrow Homes Chairman Steve Morgan in regards to light output and colour ambiance.

“The LED lamp has the highest lumen (light output) per watt for the warm white colour temperature specified of any other GU10 lamp available. The higher light output enables the house builder to reduce the number of fittings needed to create the necessary lighting levels therefore reducing costs of installation and with continued improvements on the fire rated housing, including IP44 rated as standard, it is no wonder we are having continued success in supplying this into such a prestigious house builder as Redrow Homes. With that and excellent after sales, customer care and warranty included in the offering it makes the perfect choice for any house builder or property developer.”

5W LED GU10 With Fire Rated IP44 Downlight

Comprising of a high quality 5W LED GU10 Lamp housed within a Fire Rated IP44 Downlight consisting of either a chrome, satin or white front bezel. The downlight is fire rated for 90 minutes. IP44 protection also enables the luminaire to be installed within most environments including showers and bathrooms in zone 2 environments.

Push fit WAGO connectors allow quick and easy loop in and out installation. Compared with competing models, the time saved during the installation was estimated at 2 hours for a project requiring 30 GU10 LED Downlights.
